

# SCARLETINTEL — VERIFICATION & SAFEGUARDS

ScarletIntel | Version 1.0 | Date: 2026-01-03

## Purpose

This document defines ScarletIntel's verification standards and safeguards to ensure defensible, proportionate intelligence.

## Verification Standards

Findings are supported by reproducible observations, timestamps, source identification, and confidence tagging.

## Safeguards

ScarletIntel avoids legal characterisations, behavioural inference, or prescriptive recommendations.

## Chain of Custody

Captured materials are stored with integrity controls sufficient for review and independent confirmation, without forensic claims.

## Client Responsibility

Clients determine validation, escalation, or reporting actions based on their own legal and regulatory obligations.
